About Me

My name is Linda Zheng.I went to Queens College . I am still undecided om my major, but i am thinking about doing either graphic design or computer science.

I started atttending Queens college since last spring and ever since i attended Queens college i feel in love with this college.

The reason why i feel in love with this college is because i love how big this campus is like and i also like the fact that there is so many trees around the campus. The one specific tree that i adore the most is the tree with pink flower although i dont really know the name of the tree.When i walk past these lovely trees i always wanted to take a picture with them which i never have a chance to cause of the school work i was caught in to.I also likes the fact that Queens college also have their own garden to grow vegetable for a food science class. I was always interested by this class, but never get a chance to really take this class cause it ways goes against my class schedule. After talking about all sorts of things i like about Queens college let talks about my dislike about queens college.I hated the food on campus they should have more variety when it comes to food and i think i can even cook better than people on campus.

In general I really enjoy Queens college because I really enjoy the fact that i can still enjoy some campus life in New York City unlike my other friend they went to other city college and it either too small cause it located in the Manhattan or either too old to be consider beautiful. Although I really wanted to visit City college sometimes cause I think the building is Roman style.Anyway I recommended
